INTRODUCTION

This report provides final population counts of the 1976 Census for all census divisions and subdivisions (Table 3). It is one of four regional reports (92-802, Atlantic Provinces; 92-803, Quebec; 92-804, Ontario; 92-805, Western Provinces and the Territories) which together provide coverage for the entire country. The population counts from the 1971 Census, included for comparison purposes, have been adjusted to reflect the June 1, 1976 municipal limits, in cases where population has been affected by the annexation or loss of land through the alteration of municipal limits. Detailed descriptions of such alterations may be found in the annual publication, Changes to municipal boundaries, status and names (Catalogue No. 12-201).

Table 4 of this bulletin provides an historical comparison of population counts from 1951 to 1976 for the new census divisions in Manitoba which were redelineated on January 1, 1976. The new system of 23 census divisions replaces the previous system of 20 census divisions which existed at the time of the 1971 Census.

Similarly, in the Northwest Territories, a new system of four regions has replaced the previous system of three districts which existed at the time of the 1971 Census.

A series of reference maps locating these census divisions and subdivisions may be found in another bulletin (Catalogue No. 92-811). An index map of census divisions only has been included in this bulletin.

DEFINITIONS

Province: Major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. There are ten provinces which are divided into federal electoral districts, census divisions, census subdivisions, etc. In census publications, provincial tables include the Yukon and Northwest Territories.

Census Division (CD): General term applying to counties, regional districts, regional municipalities, etc. In Newfoundland, Manitoba, Saskatchewan and Alberta, the term describes geostatistical areas that have been created by Statistics Canada in co-operation with the province as an equivalent for counties.

Census Subdivision (CSD): General term applying to municipalities, Indian Reserves, unorganized territories and subdivisions. In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in co-operation with the province as an equivalent for municipalities. It should be noted that the parts of Flin Flon falling in Manitoba and Saskatchewan, and the parts of Lloydminster falling in Saskatchewan and Alberta are treated as separate CSD s.

Census Subdivision Type: Census subdivisions (CSD s) are classified into various types, according to official designations adopted by provincial or federal authorities. With the exception of unorganized territories and Indian Reserves, the type indicates the municipal status of the CSD. The following list indicates the abbreviations used for the most common CSD types:

Ce bulletin présente les chiffres définitifs de population du recensement de 1976 pour toutes les divisions et subdivisions de recensement (tableau 3). Il s'inscrit dans une série de quatre bulletins portant sur les régions (92-802, provinces de l'Atlantique; 92-803, Québec; 92-804, Ontario; 92-805, provinces de l'Ouest et les Territoires) qui fournissent des données pour l'ensemble du pays. Les chiffres de population du recensement de 1971, qui sont indiqués à des fins de comparaison, ont été redressés en fonction des limites municipales au 1^{er} juin 1976 dans les cas où une annexion ou une perte de territoire résultant du changement des limites municipales a affecté la population. On trouvera une description détaillée de ces modifications dans la publication annuelle, Changements de limites, de statut et de nom des municipalités (n° 12-201 au catalogue).

Le tableau 4 de ce bulletin présente des comparaisons chronologiques des chiffres de population de 1951 à 1976 pour les nouvelles divisions de recensement au Manitoba qui ont été redélimitées le 1^{er} janvier 1976. Le nouveau système, qui comprend 23 divisions de recensement, remplace celui de 20 divisions qui existait lors du recensement de 1971.

De même, dans les Territoires du Nord-Ouest, un nouveau système comprenant quatre régions a remplacé l'ancien de trois districts utilisé lors du recensement de 1971.

On trouvera, dans un autre bulletin (nº 92-811 au catalogue), une série de cartes de référence qui situent ces divisions et subdivisions de recensement. Une carte-index des divisions de recensement seulement figure dans ce bulletin.

DÉFINITIONS

Province: Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Il y a dix provinces, divisées en circonscriptions électorales fédérales, en divisions de recensement, en subdivisions de recensement, etc. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

Division de recensement (DR): Terme générique qui désigne les comtés, les districts régionaux, les municipalités régionales, etc. À Terre-Neuve, au Manitoba, en Saskatchewan et en Alberta, l'expression désigne les unités géostatistiques créées comme équivalent des comtés et délimitées par Statistique Canada en collaboration avec les provinces.

Subdivision de recensement (SDR): Terme générique désignant les municipalités, les réserves indiennes, les territoires non municipalisés et les subdivisions de recensement. À Terre-Neuve, en Nouvelle-Écosse et en Colombie-Britannique, l'expression désigne également des unités géostatistiques créées comme équivalent des municipalités et délimitées par Statistique Canada en collaboration avec la province. Il est à noter que les parties de Flin Flon qui se trouvent au Manitoba et en Saskatchewan, et celles de Lloydminster qui se trouvent en Saskatchewan et en Alberta sont considérées comme des subdivisions de recensement distinctes.

Catégorie de subdivision de recensement: Les subdivisions de recensement sont classées en diverses catégories selon les appellations adoptées par les autorités provinciales ou fédérales. À l'exception des territoires non municipalisés et des réserves indiennes, la catégorie indique le statut d'une subdivision de recensement. Voici la liste des abréviations des catégories de subdivision de recensement les plus courantes:

VL Village

Indian Reserve: Territory, mostly rural and varying in size, that belongs to an Indian tribe according to treaties between the Federal Government and the Indians. It is excluded from local jurisdiction and administered by the Federal Department of Indian and Northern Affairs.

Unorganized Territory: An area without municipal organization, directly administered by the province or, when applicable, by the county. Such areas are generally characterized by large tracts of land with low population density.

The information in this report was collected on a 100% basis and as such represents the official census counts. All table headings are noted accordingly.

COVERAGE ERROR

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1971 Census to measure the extent of the bias due to undercoverage. This study estimated the over-all undercoverage rate to be of the order of 2% of the total population for persons and 1.5% for households. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults, recent immigrants, the unemployed, etc. Similar trends were obtained in connection with the 1966 Census.

Comparable studies were undertaken for the 1976 Census but the results were not available at the time this report was published.

SYMBOLS

- .. figures not available.
- ... figures not appropriate or not applicable.
- _ nil or zero.
- -- amount too small to be expressed.

Réserve indienne: Territoire, le plus souvent rural et de taille variable, qui appartient à une tribu indienne en vertu de traités conclus entre le gouvernement fédéral et les Indiens. Il échappe à la compétence des autorités locales et est administré par le ministère des Affaires indiennes et du Nord canadien.

Territoire non municipalisé: Région sans organisation municipale, administrée directement par la province ou, le cas échéant, par le comté. Ces régions sont généralement caractérisées par leur vaste étendue et par la faible densité de leur population.

Les renseignements de la présente publication ont été recueillis à 100% et représentent les chiffres officiels de recensement. Les titres des tableaux sont annotés en conséquence.

ERREUR DE COUVERTURE

Une erreur de couverture se glisse chaque fois qu'une personne ou un ménage sont omis ou comptés plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, les erreurs de couverture introduisent un biais vers le bas dans les estimations du recensement de sorte que ces dernières ont tendance à sous-représenter la population réelle.

On a entrepris une étude spéciale concernant le recensement de 1971 afin de mesurer l'importance des biais attribuables au sousdénombrement. On a établi que le taux global de sous-dénombrement était de l'ordre de 2 % pour ce qui est des personnes et de 1.5 % pour les ménages. On a également constaté que le sous-dénombrement est plus important dans certains segments de la population (par exemple, les jeunes hommes, les nouveaux immigrants et les chômeurs). Des tendances semblables ont été observées dans le cas du recensement de 1966.

On a entrepris des études du même genre pour le recensement de 1976, mais les résultats n'étaient pas prêts au moment de mettre ce bulletin sous presse.

SIGNES CONVENTIONNELS

- .. non disponible.
- ... n'ayant pas lieu de figurer.
- _ néant ou zéro.
- -- infimes.

⁽¹⁾ Manitoba census divisions were re-delineated on January 1, 1976. Figures for 1951 to 1971 are based on 1976 area. — Les divisions de recensement du Manitoba ont été redélimitées le ler janvier 1976. Les chiffres pour 1951 à 1971 sont montrés d'après la superficie de 1976.

Publications of the 1976 Census of Canada

This bulletin is one of a series of volume reports of the 1976 Censuses of Population, Housing and Agriculture.

Most of the bulletins in the regular Volume Series are data-oriented. Other reports containing more methodological, interpretative and evaluative content, are also issued. These are as follows:

- (a) 1976 Census Administrative Report
- (b) 1976 Census Quality of Data Series
- (c) 1976 Census Research Series
- (d) Introductory Reports to each of the regular Volume Series.

Also available on request is a series of Reference Lists developed largely for internal verification of basic geographical and population hierarchies, which could provide useful information to the outside user.

Users will note that the majority of census publications are colour-coded to identify with the four themes central to the presentation and to maintain comparability with the 1971 series, e.g., blue for Geographical and Demographic content, brown for Housing, Household and Family data, red for Economic Characteristics and gold for the series based on Agriculture.

These reports are listed in the 1976 Census Catalogue which can be obtained free of charge from:

Publications Distribution, Room 1200, Statistics Canada, Ottawa, Ontario. K1A 0T6

To order census publications, send a cheque or money order made payable to the Receiver General for Canada, to the above address.

In addition to published documents, the Census of Canada can provide other products and services about census: data on microform (film or fiche), computer tapes, computer print-outs, user-specified tables, maps, geographic files, geographic lists, etc.

For information write:

Census Information Services, Statistics Canada, Ottawa, Ontario. K1A 0T7

or call (613) 996 - 5254.

Inquiries about census and other Statistics Canada information can also be directed to Statistics Canada Regional Offices located in: St. John's (Nfld.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton and Vancouver.

Publications du recensement du Canada de 1976

Ce bulletin fait partie de la série des publications des recensements de 1976 de la population, du logement et de l'agriculture.

La plupart des bulletins de la série ordinaire des volumes présentent des données. On publie également d'autres bulletins dont le contenu vise plutôt la méthodologie, l'interprétation et l'évaluation. Ces bulletins sont les suivants!

- a) Rapport administratif du recensement de 1976
- b) Série relative à la qualité des données du recensement de 1976
- c) Série du recensement de 1976 relative à la recherche
- d) Introductions à chacune des séries ordinaires des volumes.

Vous pouvez aussi vous procurer sur demande une série de Listes de référence, servant surtout à la vérification interne des catégories géographiques et démographiques de base, qui pourraient fournir des renseignements utiles aux utilisateurs à l'extérieur de Statistique Canada.

Les utilisateurs constateront que la plupart des publications du recensement sont classées par couleur, chaque couleur correspondant à l'un des quatre thèmes du recensement; cela permet d'assurer la comparabilité avec les séries de 1971; ainsi, le bleu est réservé aux publications de nature géographique et démographique, le brun, aux bulletins sur le logement, les ménages et les familles, le rouge, aux publications de nature économique et la couleur or, à la série relative à l'agriculture.

Ces bulletins figurent au Catalogue du recensement de 1976 que vous pouvez obtenir gratuitement auprès de:

Distribution des publications Pièce 1200, Statistique Canada Ottawa (Ontario) K1A 0T6

Envoyez vos commandes de publications du recensement à cette même adresse en y joignant un chèque ou un mandat postal à l'ordre du Receveur général du Canada.

Outre les publications, le Recensement du Canada offre divers autres produits et services: données en microcopie (film ou fiche), bandes pour ordinateurs, états mécanographiés, totalisations spéciales, cartes, fichiers et listes géographiques, etc.

Pour obtenir des renseignements, écrivez à:

Information recensement Statistique Canada Ottawa (Ontario) K1A 0T7

ou téléphonez au numéro (613) 996-5254.

Toute demande de renseignement sur le recensement et les autres données de Statistique Canada peut également être transmise aux bureaux régionaux de Statistique Canada situés à St. John's (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton et Vancouver.

¹ It should be noted that these publications are generally released somewhat later than the data reports.

¹ Il convient de remarquer que ces bulletins sont généralement publiés quelque temps après les bulletins présentant des données.
